Season one of the four parts of the year; spring, summer, autumn, and winter.

Equator the imaginary circle around the earth that is halfway between the North and South Poles. **Habitat** where an animal or plant lives

Species the same type of plant or animal

Food chain how each living thing gets its food

Carnivore an animal that only eats meat

Herbivore an animal that only eat plants

Omnivore an animal that eats both meat and plants

Key Knowledge

- Animals are either carnivores, herbivores or omnivores
- Animals obtain their food from plants and/or other animals. This creates a food chain.
- Both animals and plants live in habitats suited to their needs.
- Branches, leaves, flowers, trunks, fruit and roots are all parts of trees.
- The weather changes depending on where you are in the world and what time of the year it is. Here in the UK we have 4 seasons where the weather changes.
- Most Rainforests however only have two seasons wet and dry each lasting 6 months.
- There are some similarities and many differences between a forest in the UK and the Amazon Rainforest

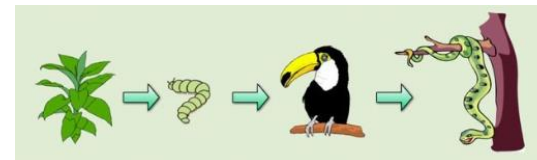

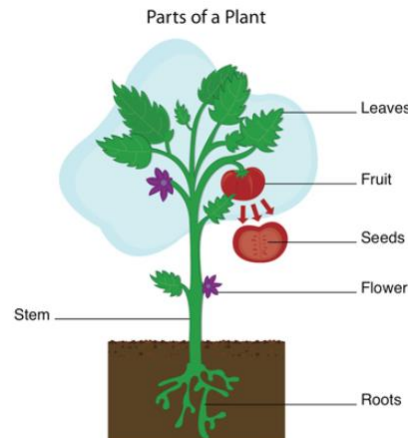

Rainforests are home to more than half of the world's plant and animals species!
